Parent Dashboard

Description

The purpose of our parent dashboard is to provide an efficient system, allowing data collection and analysis of children performing tasks and activities on the platform by tracking and measuring their educational success. Each section comprises synthesized student's data in different computing formats so that they can improve children's' reading comprehension. This section offers a snapshot of what each system does and how it helps parents increase their children's literacy retention. The parent dashboard has eight data collection sections, presenting parents with a holistic mapping of their student's academic progress.

Parents play a significant role in our product creation throughout, and we would love to know your thoughts and suggestions. Insights from your feedback help us improve, so we highly appreciate and welcome all appropriate comments!
